	Examiner John E. Rovnak	Art Unit 3714	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3714

Applicant's amendment to the specification regarding priority does not include a reference to U.S. Patent No. 6,626,678.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 21, 22, 26-30 and 33-37 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2 and 7 of U.S. Patent No. 6,626,678. Although the conflicting claims are not identical, they are not patentably distinct from each other. It would have been obvious to one of ordinary skill in the art in view of the patent claims that the user could be an adult subject, that the pieces are suitable for arrangement by the subject, and the pieces can be used by the subject in a simple assembly. It would further have been obvious that the patent claimed kit has means for engaging pieces on a rack and that where when so engaged the pieces resist accidental disarrangement (Patent claim 1 – (i) means for engaging the tile elements at a plurality of loci on the rack).

Art Unit: 3714

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-24, 26 and 33-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Foresman in view of BrightSteps, by Infantino.

Foresman discloses a plurality of pieces that have a surface layer formed of foam and collectively exhibit different tactility when handled (due to different shapes), the pieces suitable for arrangement in a simple assembly, and a means for engaging said pieces on a rack wherein the pieces resist disarrangement. Although Foresman defines the use of foam and not a surface layer formed of a soft fabric, it would have been obvious to one of ordinary skill in the art, in view of the photographs displayed in the BrightSteps advertisement, that educational objects could comprise an outer surface layer formed of a variety of soft fabrics, the choice of individual fabric types being a matter of design. The pieces of Foresman can be engaged to other pieces simply by arranging them to touch on the board. The Foresman pieces have touch fasteners that can obviously be used to attach pieces together.

Claims 25 and 31-32, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
